Index—Volume 2

Article Index

Papers

Effects of pipe elbows and tube bundles on selected types of flowmeters
G. E. Mattingly and T. T. Yeh 4

Determination of installation effects for a 100 mm orifice meter using a sliding vane technique
T. B. Morrow, J. T. Park and R. J. McKee 14

EEC orifice plate programme – Installation effects
J. A. Sattary 21

Header effects on gas flow profiles
B. Harbrink 34

Choosing flow conditioners and their location for orifice flow measurement
J. A. Brennan, C. F. Sindt, M. A. Lewis and J. L. Scott 40

The computation of turbulent flow through pipe fittings and the decay of the disturbed flow in a downstream straight pipe
M. Langsholt and D. Thomassen 45

Vortex flowmeters – Installation effects
R. C. Mottram 56

The effect of double bends out of plane on turbine meters
P. M. A. van der Kam and K. van Dellen 61

Practical experiences using ultrasonic flowmeters on high pressure gas
J. L. Holden and R. J. W. Peters 69

Effects of unsteady phenomena on flow metering
P. Grenier 74

A study of flow through a perforated-plate/orifice-meter package in two different pipe configurations using laser Doppler velocimetry
E. P. Spearman, J. A. Sattary and M. J. Reader-Harris 83

Advantages of orthogonal and non-orthogonal three-dimensional anemometer systems
G. L. Morrison, M. C. Johnson, D. H. Swan and R. E. DeOtte, Jr 89

The impact of water slugs on wet steam flowmeters
I. Owen, I. B. Hussein and A. M. Amini 98

Towards a phase-distribution-independent impedance volume-fraction measurement
G. P. Lucas and S. Simonian 105

3-D laser Doppler anemometry measurements of the axisymmetric flow field near an orifice plate
R. E. DeOtte, Jr, G. L. Morrison, D. L. Panak and G. H. Nail 115

Microcomputer-based calibration noise generator
R. J. Deloughry and I. Davenport 124

Visualization of fluid motion by tagged magnetic resonance imaging
M. Tyszka, N. J. Shah, R. C. Hawkes and L. D. Hall 127

Three-dimensional magnetic resonance imaging of very slow coherent motion in complex flow systems
M. Tyszka, R. C. Hawkes and L. D. Hall 131

Difference measurement using Coriolis mass flowmeters
W. Kiehl 135

Wet steam flowmeter correction factors
I. Owen and I. B. Hussein 139

Turbine and related flowmeters: 1. Industrial practice
R. C. Baker 147

The use of étoile flow straighteners with orifice plates in swirling flow
F. C. Kinghorn, A. McHugh and W. D. Dyet 162

The influence of shedder shape on the performance of the electrostatic vortex flowmeter
A. K. El Wahed and J. L. Sproston 169

Dimensional and symmetry analysis of Coriolis mass flowmeters
H. Raszillier and V. Raszillier 180

An investigation of sonic and ultrasonic flowmeters with transducers in free stream
E. Olsen 185

Measurement of gas flowrate by using a heat pulse
Hae-Man Choi, Kwang-Bock Lee and Kyung-Am Park 188

On-line measurement of low void fraction and mass flowrate with a side-tube and an orifice in two-phase flow
K. H. Chien, N. M. Chung, W. K. Lin, B. S. Pei and C. H. Lee 193

The zero-flow performance of a sing-around ultrasonic flowmeter
J. Delsing 205

Calibration of flowmeters in superheated and wet steam
I. B. Hussein and I. Owen 209

Typical flow measurement problems and their solution in the electricity supply industry
W. D. Cairney 217

On the detection of a low-dimensional attractor in disperse two-component (oil–water) flow in a vertical pipe
G. M. Oddie 225

BS 7405: The principles of flowmeter selection
R. A. Furness 233

Void fraction measurement by a computerized double-point resistivity probe
M. Behnia and S. J. Gillespie 243
